About ISNRE2026

We are delighted to welcome all researchers, industry professionals, and thought leaders in the energy sector to the 4th International Summit on Non-Renewable and Renewable Energy (ISNRE2026), which will be held in Venice, Italy on August 24–25, 2026.

Following the successful completion of our previous editions- ISNRE2023 in UK, ISNRE2024 in Spain and ISNRE2025 in Germany, we are thrilled to announce that ISNRE2026 is set to be even more impactful. Building on the strong foundation of these past summits, ISNRE2026 will continue to serve as a premier global platform to advance discussions on the transition from non-renewable to renewable energy sources, the integration of sustainable technologies, and the development of innovative strategies to address the world's evolving energy challenges.

Over two intensive and inspiring days, attendees will engage in high-level plenary & keynote talks, panel discussions, technical sessions, and networking opportunities designed to spark collaboration and foster actionable solutions. This summit will bring together leading voices from academia, industry, and government to share the latest breakthroughs, explore critical challenges, and discuss pathways toward a more sustainable energy future.

We look forward to welcoming you to Venice for an impactful and memorable edition of ISNRE!

Conference Topics

- Solar Photovoltaics and Concentrated Solar Power (CSP)
- Wind Energy Technologies and Offshore Wind Farms
- Hydropower and Ocean Energy (Tidal, Wave, OTEC)
- Bioenergy, Biomass Gasification, and Biogas Systems
- Geothermal Energy Exploration and Utilization
- Renewable Energy Storage Technologies
- Emerging Renewable Energy Technologies & Trends
- Integration of Renewables into Smart Grids
- Renewable Hydrogen and Fuel Cells
- Policy, Economics, and Financing of Renewable Energy Projects
- Coal and Clean Coal Technologies
- Oil and Natural Gas Exploration and Production
- Advanced Fossil Fuel Combustion and Emission Control
- Nuclear Energy and Next-Generation Reactors
- Carbon Capture, Utilization, and Storage (CCUS)
- Non-Renewable Energy Transition Strategies
- Environmental Impacts of Non-Renewable Energy Extraction
- Hybrid Renewable-Non-Renewable Energy Systems
- Energy Storage and Battery Innovations for Hybrid Systems
- Microgrids and Distributed Energy Resources (DER)
- Hydrogen Economy and Power-to-X Technologies
- Electrification of Transportation and EV Infrastructure
- Energy Efficiency and Demand-Side Management
- Climate Change Mitigation through Energy Systems
- Life Cycle Assessment of Energy Technologies
- Sustainable Energy for Developing Regions
- Artificial Intelligence, IoT, and Big Data in Energy Systems
- Blockchain Applications in Energy Trading
- Energy Cybersecurity and Grid Resilience
- Future Energy Trends and Roadmaps to Net Zero

Why to Attend???

- Meet worldwide Experts, Exchange ideas and network with leading researchers.
- Learn and discuss quality initiatives, key news and challenges with senior level speakers.
- Learn skills and stay up-to-date with presentations, panel discussions, round-table discussions, and workshops, we cover every topic from top to bottom, from global macro issues to strategies to tactical issues.
